

EPS – New and Improved Prescription Tracker

Detailed prescription event history – every step of the process!

www.hscic.gov.uk/eps/tracker

New search by NHS number, date range and prescription status

The new tracker provides transparency to both prescribers and dispensers.

Practice and pharmacy can check the current status of a particular prescription and can advise patients with confidence.

The tracker shows the nominated destination of a specific prescription and where a nomination has been changed.

Help and Guidance

Find by Prescription ID

The "Prescription ID" uniquely identifies each prescription within the EPS. The ID is printed as a barcode and as text on prescription tokens.

Enter the ID exactly as it is printed on the prescription token, including the '-' characters.

Enter Prescription Details

If you don't have the unique Prescription ID then you can search for a patient's prescriptions using other information.

The 'Start Date Range' will be date of prescribing for the prescription(s) you are looking for.

The 'Prescription Version' can look for: all prescriptions, or EPS R1 prescriptions, or EPS R2 prescriptions which are fully electronic.

New search by NHS number

Detailed search results: prescription ID, status, issue date, prescription date i.e. repeat dispensing 1 of 4

Benefits of the new prescription tracker

- **Transparency** to both prescribers and dispensers.
- Practice and pharmacy can check the **current status** of a prescription and can advise patients with confidence.
- Pharmacies can **'cut and paste' the prescription number** (barcode G.U.I.D) into their dispensing system to retrieve the prescription.
- Helps to ensure **nomination rules are followed**, as it shows the nominated destination of a specific prescription and where a nomination has been changed.
- Allows pharmacies to **double check that a claim has been submitted** - useful for expensive items.
