

7<sup>th</sup> December 2015

The LPC thought you may find the reminder calendar useful.

With the movement of recording and claiming for (almost) all Local Enhanced Services onto PharmOutcomes from the 1<sup>st</sup> September, the end of the month workload has been reduced. The attached reminder calendar summarises some common activities in Cornwall Pharmacies. It is attached as a PDF and also as a spreadsheet, so that pharmacies may add to it, if that is helpful.

We strongly encourage pharmacists and pharmacy teams to use PharmOutcomes during consultations (rather than add data on at a later time) where this is appropriate and possible

PharmOutcomes must be signed into using the log-on details for the pharmacy where the service is being delivered and will show only the services that are commissioned for that pharmacy. (If services that you think should be visible are missing, the commissioner should be contacted.)

There is information on the LPC website (under the “Commissioned Services” tab) about each of the commissioned services, including accreditation requirements. Please keep an eye on the website and Newsletters for information on training dates and locations.
