

Asthma review: referral log

One of the eight quality criteria under the Quality payments scheme is that “...the pharmacy can show evidence of asthma patients, for whom more than 6 short acting bronchodilator inhalers were dispensed without any corticosteroid inhaler within a 6 month period, are referred to an appropriate health care professional for an asthma review.”

To keep track of who has been referred, you can use Table 1 to record details of individuals who have been referred to their GP.

Table 1: Record of referral

Date of referral	Patients full name and address	GP name and practice address	Details of intervention (e.g. reason for referral, any action taken in the pharmacy)	Full name of team member making the referral
