Dear Contractor

Re: - Conditions Precedent Document

Your pharmacy may well have received a document from the contracts team at the CCG contracts team asking for a lot of information to be submitted. This was a letter that went to all the CCGs contract holders not just pharmacies. If you are a multiple this document may have gone to your head office.

The LPC was not aware of this document until after it was sent out. We have now had discussions with the CCG to reduce the information that is required. What is actually required is not yet totally agreed. In the mean time we have got agreement that you do not need to respond by the date on the letter. You will receive new information from either the LPC or the CCG as to what is required in the next few weeks with a new deadline.

Any queries about this please contact me.

Regards

Phillip
