PROVIDING SAFE ACCESS TO MEDICINES

Getting medicines to patients

Pharmacles will supply medicines to patients making use of technology and collaborative arrangements between businesses.

Supporting adherence

The New Medicine Service will enable pharmacists to provide extra support to patients newly prescribed medicines for a wide range of long-term conditions.

Taking pressure off urgent care and GP services

The Community Pharmactal Consultation Service (CPCS) will support this. People will be directed to community pharmactes us a first port of call for minor liness or the urgent supply of medicines, relieving pressure on the wider NHS.

Helping patients coming out of hospital

Patients coming out of hospital will be supported by their local pharmacy to help them to understand any new medicines and how they fit with their ourent regimen, via a medicines reconciliation service.

Embracing technology and digital communications

All pharmacles will utilise healthcare technology such as the Electronic Prescription Service (EPS), NHSmall and Summary Care Records, linking them digitality to the rest of the NHS. Pharmacles will have comprehensive NHS.UK profiles and will communicate with patients using digital technology and apps.

Improving medicines safety

Patients taking patilative care medicines will be able to get them directly from their local pharmacy, and many pharmacles will undertake prescribing audits and risk reviews to improve patient and medicines safety.

Smoking cessation Improving uptake of vaccinations support PUBLIC Pharmacles will offer stop Pharmacies will provide a HEALTH AND smoking support which range of vaccinations to patients may be referred to DETECTION help meet Government from other care settings. immunisation targets. Championing public health Identifying those at risk of disease All pharmacies will be Healthy Living

At pharmacies will be Heatiny Living Pharmacies, making them local tubs promoting health, wellbeing and self-care, and providing services to prevent II-health. Pharmacles will be key supporters of NHS public health campaigns.

Pharmacles will provide Hepatitis C testing us well as screening to identify people with high blood pressure or cardiovascular disease.

Providing diagnostic point-of-care testing

Pharmacles will use point of care test and treatment services for common aliments such as Urinary Tract Infections and Strep throat infections. This will mean they can provide appropriate treatment while also supporting efforts to tacke antimicrobial resistance.

A KEY PART OF

THE PRIMARY

CARE TEAM

Supporting local priorities

Community pharmacy will work to support Primary Care Networks (PCNs) and pharmacles may offer a range of services to meet local priorities such as the provision of emergency hormonal contraception (EHC); NHS Health Checks; and healthy eating and weight loss advice.

Providing ongoing support for patients

SUPPORTING

HIGH QUALITY

CARE

Helping people with

long term conditions

Many pharmacies will check if

patients with diabetes have had

annual foot and eye checks and

they will make efforts to become

Dementia Friendly environments.

Patients on repeat prescriptions (for example, those taking oral contraception) will receive routine safety checks from their local pharmaolst.

For information: Community Pharmacy Contractual Framework service development grid and IT implications/preparations

This grid is reproduced below to assist digital priority considerations at the March CP ITG 2020 meeting and beyond. It continues to illustrate how changes to the services within the <u>Community Pharmacy Contractual Framework (CPCF)</u> are expected to be phased. The roll out of all pilots will be subject to each pilot demonstrating that the substantive service will offer value for money. The grid may assist CP ITG's work on its <u>Digital Priorities List</u>.
