Chair's Report – Bina Patel

The last year has been a year of change in both thought, word and deed.

After a year to settle into the new role I stepped in to make some changes with the functioning of the LPC. This began with cancellation of a Committee meeting in May 2019 in order to free the Committee members who represent you to go out and visit the contractors and make a concerted effort to increase LPC forum attendance. This I felt was necessary for your new Committee to engage with you the Contractors. My focus is on ensuring that the LPC represents the Contractors and if we engage and listen to what you need then we can do our job properly. The LPC committee is not just a "talking shop" but an organisation voted by you the Contractor to represent and support you; we need to work with you to deliver the outcomes, and your opinions and actions help shape the outcome.

In June/July 2019 there were two big ticket items, the launch of the GP network Direct Enhanced Service (DES), which brought Primary Care Networks into our line of vision, and the 5 year Community Pharmacy Contractual Framework which was agreed between PSNC, NHSE&I and DHSC.

Primary Care Networks do offer opportunities for contractors to work together for a common purpose and to properly engage with GP practices, the development of this will be patchy at first as the GP networks are at different stages of maturity. Key to this was getting in at an early stage, the LPC worked with the enablers in CCGs to ensure this happened, and also mapped pharmacies to PCNs. The LPC has completed this task and as a result we now have PCN Pharmacist leads elected by the PCN locality Pharmacists. I would encourage colleagues to work together to help progress further joint working with GP PCN networks.

The new contract flat funding, which is disappointing for some and could leave many struggling pharmacies, particularly vulnerable outlets, was a worrying issue. The assertion that "well at least they didn't impose any more cuts" is not helpful when costs continue to increase for Contractors. The LPC will therefore endeavour to maximise uptake of available services when they come on stream however again I would encourage colleagues to ensure service delivery is at its level best standard to enable the LPC to have a stronger base to work with when negotiating for commissioning of further services.

In August the LPC raised the importance of peer discussions as part of revalidation, and as a result the LPC facilitated events locally to enable colleagues to complete the peer discussion element of the Revalidation process.

During September we held our annual Conference and we were lucky to have Gordon Hockey, Director of Operations and Support at PSNC who gave us further insight into the

new Contractual arrangements. We also attended the PSNC conference at which the independent review into contractor representation was announced. In this period we also started a review of Governance at the LPC and also migration of the Healthy Living Partnership into the PSNC model. For colleagues it was also the opening of the Pharmacy Quality Scheme window.

With the announcement of the Community Pharmacist Consultation Service (CPCS) a study day was organised in conjunction with CPPE to ensure colleagues had a better knowledge of CPCS, patient assessment etc for delivery of the CPCS service. This was a highly attended event with more than 96 attendees. The LPC also organised locality meetings to raise contractor awareness of the PCNs, importance of engagement with PCNs and also discussing and selecting a lead for the identified PCN. Once again attendance to these events Essex wide was excellent.

In the new year we all had to meet the PQS deadline and support was available to ensure colleagues were enabled to do so. The Committee meanwhile was at this point busy responding to the outcomes of the Wright review into contractor representation. Ash Pandya left us in late 2019 after a long period of service to the LPC, and we wish him well in the future. In early 2020 following an advertising/interview process we appointed Karen Samuel-Smith as our now Chief Officer. I would like to congratulate Karen and I am sure you will be pleased to know of her appointment into the position. I am sure she will continue to deliver a high standard of service.

I would like to think that the changes we have made to the LPC's functionality reassures every one of the focus the Committee and the Office has on joint working, to deliver bigger and better results from here onwards.

By March 2020 the world went into COVID-19 pandemic situation. Thank you to all colleagues for their tremendous effort to support the public and show the true colours of Community Pharmacy.

This has been a stressful time for everyone, but I would like to thank the committee; Karen and the office staff for the tremendous job they have done in the last year. It has been a time of change and upheaval, but it also continues to be so due to the current situation with COVID-19.

Bina Patel
Chair
Essex LPC

Chief Officer's Report – Karen Samuel-Smith

As I write this report at the end of 2019/20 and look back at the previous year, the impact of the global Covid-19 pandemic cannot be ignored: The retrospective view of the whole year feels a bit like looking through a telescope the wrong way, however it is necessary that we reflect on the whole year in context.

This is my first report as Essex LPC's chief officer, Ash Pandya left the organisation in October after 11 years' service. As an executive office and as a committee we have undergone a thorough review of our workforce, our stakeholder relationships and our ways of working to try and meet the needs of contractors. We have an increased focus on transparency and accountability and have reinstated our office motto "We work for Them" meaning we work for you, the contractors.

I would like to thank Penny Skellern, Jon Lake and Simon Moul for their work as the LPC Governance, Scrutiny and Oversight Committee in the past year: they have had some big issues to address and some difficult decisions to make, but thanks to their work you have assurances that the standards you should expect from a representative committee funded by your levies are being upheld.

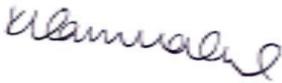

The office is moving towards a flatter, broader structure which should ensure more troops on the ground where needed, more opportunities for proper two-way communication and listening to contractor concerns, and building relationships with the real decision makers where we can have more influence in commissioning organisations. At the hub of this is our office manager Angela Culleton, who has stepped in and stepped up to all manner of challenges during the year with her enthusiasm, warm personality and (almost) endless cups of tea. She has organisational skills I can only dream of. I would like to take this opportunity to thank her for all her support and hard work: and as contractors I think you should thank her too.

Thanks also to Frank McLaughlan, who some of you may remember from his time on the committee in the past. We initially asked Frank to come and support us with EMOP/TCAM (hospital discharge) uptake to ensure we received the full grant from the Academic Health Science Networks. Frank has also been supporting the Covid-19 response on an interim basis in West Essex.

The big news story for contractors in 2019/20 was of course the announcement of a five-year Community Pharmacy Contractual Framework. This provided at least an idea of direction of travel for the next 5 years, and sought to offer a degree of financial stability in that the funding remains fixed rather than further cuts: however in real terms a fixed remuneration represents a year on year fall as it does not factor in inflationary pressures and other costs on pharmacies as employers. Further, although the total envelope may be consistent, access to some services may not be available to all contractors equally and much of our work is and will continue to be ensuring contractors are aware of and taking up as many opportunities as they are able to.

Following this announcement PSNC announced a review into contractor representation and negotiation, which has been undertaken by Professor David Wright from University of East Anglia. The whole of the committee contributed to the response, and we are pleased to note that more contractors from Essex undertook the survey than any other single LPC. The review publication was delayed by covid-19; however, we anticipate this will frame the expectations of, and workplan for the committee and office in the next year. No doubt this will throw up some challenges, but I am confident that our own reflections in the past year have put us in a good place to rise to these: To use your levies responsibly to represent Essex contractors to the best of our abilities.

I look forward to working with you all in the coming year.

Karen Samuel-Smith
Chief Officer
Essex LPC

Just wanted to say thank you
Karen for the extra effort you
are putting in for your
regional colleagues

2019-2020 Commissioned Services

Public Health Statutory Services

Needle Exchange services

These are managed by Open Road.

"The past few months have been very difficult for Open Road's Needle & Syringe Programme due to the ongoing issues with Covid-19. We have seen a change in the way we work with the public, and this has been challenging to say the least. Our pharmacies throughout Essex have continued to provide an outstanding service under extremely difficult circumstances and continue to do so. We thank everyone involved for their continued hard work and dedication during this unprecedented time.

We were hoping to deliver another workshop to help continue to develop our working relationship, but again due to the current situation this has not been possible. We hope that we will be able to resume this sometime next year.

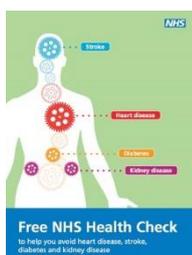

"Neo360' is continuing to work well for most of our pharmacies, with the system managing orders directly with the supplier and therefore reducing staff time and stock wastage.

We hope that once normality resumes, we will be able to continue with face-to-face site visits across the county to strengthen our partnership and provide even better support for all our service users along the way.

Leah Vincent, Open Road

NHS Healthchecks

"This service is managed by Anglia Community Enterprise (ACE).

34 pharmacies were commissioned in 2019/20 and together these delivered 3,896 healthchecks. Checks covered advice on cholesterol 41.6%, BMI 56%, blood pressure 16.5%, smoking 13.2%, and alcohol advice 20%"

Linz Partner - Data support –GP and Pharmacy -North, CVD Primary Prevention Team

Sexual Health Services

Essex Sexual Health Service (ESHS), has a contract with HLP Ltd to manage sexual health services in both Essex and Thurrock. This consists of provision of emergency contraception to women aged 19 and under, a condom distribution service using a smartphone app Ec-Card, provision of chlamydia treatment via PGD. During 2019-20 emergency contraception was provided on 689 occasions.

Stop smoking services

The Essex Lifestyles service has a contract with HLP Ltd to manage the stop smoking service in Essex pharmacies. This service has been growing year on year despite falling smoking prevalence, and in 2019/20 supported over 1406 smokers to quit.

Substance misuse supervised consumption services

There are 172 pharmacies listed who have contracts, but not all submit data sheets or invoices.

This year we have had 3 new pharmacies join the Supervised Consumption Scheme and one withdrawn.

Overall, the monies paid for the last financial year is just over £100,000.00, but due to the current situation, I am still waiting for a large amount of submissions for Quarter 4

Jackie Smith, Essex STaRS

Southend-on-Sea Borough Council

Needle Exchange and Substance Misuse services

Both are managed under a contract with Lloyds pharmacy. We have requested information regarding activity under this contract but have not had a response.

NHS Healthchecks

These are not commissioned from community pharmacies in Southend-on-Sea.

Sexual Health Services

Southend-on-Sea Borough Council commissioned sexual health services. We have requested information regarding activity under this contract but have not had a response.

Stop Smoking Services

These are managed in-house by a team within the Public Health directorate, led by Tony Mardle

“The number of pharmacies who engaged with the service is down from last year to just 19. They produced 309 quit attempts leading to 136 confirmed quits (44% success rate). Of these 136 there were 95 carbon monoxide readings (70%) 59 were lost to follow up (19%). We continue to pay £50 per successful quit with an additional £50 if that quit has a co reading that confirms the quit.

Of course, COVID has had a massive impact on the tail end of last year and into this year with footfall halved. I am sure that we will have to produce a recovery plan at some point."

Tony Mardle, Public Health Manager, Stop Smoking, Southend Public Health

Thurrock Council

Needle Exchange and Substance Misuse services

Both are managed under a contract with Inclusion.

Number of Pharmacies providing Supervised Consumption, 12.

13 Pharmacies in Thurrock – 1 currently has no clients supervised.

Number of pharmacies Supplying Needle Exchange, 5.

Previously 6 pharmacies supplying service – 1 stopped during the year

Service Manager and Clinical visited majority of pharmacies providing supervised consumption, we could not complete due to Lockdown. The purpose of the visits was to discuss and develop partnership working and for both parties to agree to a new Good Practice guide. Pharmacies were accommodating and all signed the Good Practice agreement. It also gave us an opportunity to discuss any areas that may have needed development and improve communication between all parties. Inclusion Visions found the visits helpful and felt they strengthened our partnership work with pharmacies.

Kim Mandy - Thurrock Visions INCLUSION

NHS Healthchecks

These are not currently commissioned from community pharmacies in Thurrock.

Sexual Health Services

See Essex County Council.

Stop Smoking Services

"There are currently 5 pharmacies who are actively providing the stop smoking service on behalf of Thurrock Healthy Lifestyle Service, Thurrock Council within Thurrock and for 19/20 these pharmacies and their staff have been busy supporting the residents who smoke to quit smoking and improve their health. For 19/20 our pharmacies supported 83 smokers to set a quit date with 25 of those achieving a 4-week quit and 8 still smoke free at 12 weeks. Pharmacies provide a valuable community resource for residents who cannot access services at times that are convenient to them, and we want to work with more Thurrock pharmacies to provide the service locally. Obviously, due to COVID-19, activity has had to

reduce in pharmacy in order for them to prioritise work and redeploy staff and we are grateful for the work they do in continuing to have those making every contact count conversations and signposting smokers into our service. For pharmacies who are interested in providing the stop smoking service for our Thurrock residents please contact Thurrock Healthy Lifestyle service on 0800 292 2299 or email thurrock.ph@nhs.net"

Tina Lincoln, Service Manager, Thurrock Healthy Lifestyle Service

Other locally commissioned services

Thurrock Council Occupational Health 'Flu vaccination service

This service was commissioned for a second year and delivered 240 vaccines to council employees at the council offices and works depot. This service has proved successful enough that the council are offering a four-year contract.

Thurrock and Basildon and Brentwood CCG warfarin service

This service was commissioned again throughout 2019/20. This service was commissioned in South West Essex

Warfarin Service 2019-20	new registrations	ongoing checks	Total £
Basildon and Brentwood	443	1371	21,199
Thurrock	176	598	8,902

North East Essex COPD service

This service, providing COPD rescue packs where appropriate and following a COPD review, was commissioned for a third winter

NPA and Provide hypertension and ABPM pilot service

This was commissioned from 10 pharmacies across all CCG areas. The pilot examines the feasibility of pharmacies screening patients for hypertension and conducting ABPM to diagnose patients with a high reading at screening.

Between December 2018 and December 2019 there were 314 total blood pressures taken, 117 ABPM and 3 HBPM.

Essex LPC Contractor Representation Work

Market Entry

We have seen the volume of market entry applications for new pharmacies decline each year since the funding changes in 2016, and most of our work in this area is now associated with relocations and consolidations. We are happy to advise existing contractors on this and have a breadth of experience of applications and appeals to draw on.

Pharmacy Applications April 2019 – March 2020					
Application	Approved	Refused	Withdrawn/ Lapsed	Awaiting Decision	Applications Received
Application for Relocation - No Significant Change	4				4
Application Offering Unforeseen Benefits	1				2
Identified Future Improvements or Better Access					
Application for Distance Selling Pharmacy					
Consolidation	2				2
TOTAL	7				8

18 pharmacies changed their supplementary hours

Complaints, Contract Breaches and Performance Management

Those of you who attended our “raising the bar” conference back in February 2016 may recall the importance we placed on ensuring regulatory and professional obligations as the bedrock of service development. As we predicted at that time there has been a marked increase in the number of pharmacy cases being considered by NHS England and Improvement, either through the Contracts Team which manages breach and remedial notices, or through the Performance Advisory Group which considers complaints or incidents giving cause for concern, authorises investigations and determines appropriate action.

We attended five contract monitoring visits at the request of contractors in 2019/20, although the role is largely to observe we can often help the contractor demonstrate the evidence that NHSE requires and advise on subsequent action plans. We are continuing to lobby for visit reports to reflect the visit in its entirety and not just areas requiring improvement, as is current practice.

Essex LPC is consulted on breach notices and attends Performance Advisory Group meetings to represent contractors. We also attend associated performance meetings and investigations. Because of the increased activity in this area we have invested in attending the NHS Resolution case manager training, which has both given us greater insight into the

working of the NHS performance arrangements and gained the organisation a degree of credibility from other panel members and case managers.

Naturally it can be quite daunting for contractors to be subject to a complaint and/or an investigation, we have lobbied for improved communication between case managers and contractors and we continue to monitor this.

Our request to contractors would be to speak to us as soon as you are aware that there has been a complaint or that you receive a request for a factual account: Many cases can be resolved and closed early if a timely and complete response is provided at this stage. Unfortunately, we still get a lot of calls at "the 11th hour" which makes a considered response more difficult and has probably caused more sleepless nights than it needed to.

Understandably the confidential nature of representing contractors in performance processes prevents us from including details of this work in the body of the annual report. Activity is reported to the committee anonymously and in terms of progress through the various stages of the performance management process rather than details of the matter under consideration.

Promoting Community Pharmacy

Patients and public

Essex LPC has promoted Community Pharmacy at community groups and events throughout the year including giving talks or presentations to Vange Ladies, Wickford Huff'n'Puffs and the West Essex Medicines Champions.

We were asked to judge a children's drawing competition promoting community pharmacy in North East Essex, and the entries are still displayed on the LPC office meeting room wall.

Capacity within the office team limited this activity to some extent however, and this is an area that requires more work in the coming year.

Health and Social Care Partners

We represent Essex Community Pharmacy at a number of CCG committees and steering groups, however capacity remains an issue: we would always welcome expressions of interest from contractors who have an area of expertise who would be willing to attend relevant meetings, either on a regular basis or to contribute to task-and-finish groups (not listed.) These are increasingly becoming on-line meetings which may address some

previous challenges to pharmacy attendance. In 2019/20 we have attended or been invited to attend:

North East Essex CCG

- Respiratory Network (meets every 2 months)
- Diabetes Service Board (meets every 2 months)
- CCG "bite size" team meetings (ad hoc)
- One Colchester Delivery Group (meets every 2 months)
- Area Prescribing Committee (monthly. Usually attended by Suffolk LPC who feedback)

Mid Essex CCG

- Clinical Cabinet (monthly)
- Area Prescribing Committee (monthly)
- Communications and market steering group (monthly)

Thurrock/Basildon and Brentwood CCGs

- South West Diabetes Network (meets every 2 months)
- South West Respiratory Working Group (meets every 2 months)
- Clinical Executive Group and Practice Manager Forum (ad hoc)
- Southend and Castle Point and Rochford CCGs
- Drugs and Therapeutics Committee (monthly)

West Essex

- Diabetes expert oversight group (monthly)
- Gastro expert oversight group (monthly)
- Respiratory expert oversight group (monthly)
- Medicines Optimisation Programme Board (monthly)
- Medicines Champion Group (ad hoc)
- Pharmacy Network meeting (every 2 months)
- Epping Forest Health and Wellbeing board (every 2 months)

Essex-wide and regional

- Essex Pharmacy Leads Group (usually every 2 months)
- Essex PNA steering group. Although PNA is valid for 3 years the steering group regularly convenes to consider supplementary statements and challenges to the PNA.
- Anglia LPC/NHSE meeting (usually every 2 months)

We have also supported Essex Health and Wellbeing board at an MP meeting where the Pharmaceutical Needs Assessment was challenged, promoting community pharmacy and providing technical and contextual information to support the HWB's position.

We continue to meet regularly both formally and informally with Essex Local Medical Committee (LMC) and have worked together to try and resolve any concerns or misunderstanding between practices and pharmacies without the need for escalation to commissioners.

Events Arranged for Contractors

Thank you so much for commissioning the Talk Cancer training and providing such an engaged audience. It has been very good to meet pharmacists and pharmacy staff across Essex at the training events

Cancer Research UK

Forum Meetings

A total of 17 forum meetings have taken place this year (6 in South, 4 in North East and Mid and 3 in West). Unfortunately, 4 meetings were cancelled due to low numbers.

Thanks so much for today. Working with people like you makes my job so enjoyable

Pharma representative

However, there have been several additional meetings that have occurred on specific topics, including 5 Peer Review sessions for revalidation and two Pharma company led meetings.

Essex LPC Meetings

4 meetings have taken place with Committee Members. May 2019 meeting was cancelled.

LPC Annual Conference

Gordon Hockey, Director of Operations and Support from PSNC was our key speaker at the Essex LPC Conference that took place on 18th September 2019. He discussed the "Five-year deal on the Community Pharmacy Contractual Framework (CPCF)". 102 contractors attended the meeting.

AGM Notes from Wednesday 18th September 2019

Chair's Introduction

Bina Patel thanked all the Contractors present at the AGM for attending.

Bina Patel is striving for community pharmacist to unite and work cohesively; she acknowledged the pressure everyone is currently under and how essential it is to support each other at such a busy time.

Minutes from the AGM held on Wednesday 19th September 2018 were formally accepted by Rajiv Sharma and seconded by Abimbola Faseun.

Essex LPC Annual Report

Ashok Pattani firstly apologised for not have the accounts being included in the annual report, due to unforeseen issues. He confirmed the audited accounts will be available on the Essex LPC website in October 2019

Proposed by Rajiv Sharma and seconded by Prinal Ruparel

Essex LPC Annual Report 2018/19 was therefore formally approved and adopted by those present.

Essex LPC Financial Report

Ashok Pattani verbally explained the 2018/19 financial position for Essex LPC.

Couple of points mentioned, included sponsorship has been declining over the last couple of years. Essex LPC Office had IT system updated at the beginning of the year.

The reserve is lower than PSNC recommendation safety level. The levy for Essex, at 11.5p is the lowest within East Anglia

No questions were raised, Ashok Pattani asked for a proposal from the floor to adopt the unaudited LPC accounts.

Proposed by Rajat Patel and seconded by Mark Howell

Contractor Development

Unfortunately, the Contractor Development event scheduled for the 21st January 2020 was cancelled.
