Levy Holiday for December 2020

Essex LPC is delighted to announce because of the savings we have made during covid-19, by working differently and reviewing workforce, we are in a position to have a levy "holiday" in December. The Committee voted unanimously for this as the right thing to do with the monies saved.

FREE PPE

Have you registered for **FREE** PPE and hand sanitiser through the procurement portal? If not, register now! Why pay for PPE when you can get it for free?

This should now be your first line for accessing masks and hand sanitiser for all staff, and gloves and aprons if you are carrying out procedures that require them. It is important to use this route as the stock is all of approved quality. This is the link to register <https://nhs-ppe.co.uk/customer/authentication>

Use of PPE can be effective mitigation (defence) against staff being required to self-isolate, therefore maintaining business continuity.

Pandemic Delivery Service restarted

As you may have also seen the pandemic delivery service will restart from 5th November 2020 until 3rd December 2020. People who are clinically extremely vulnerable will be advised by the Government not to go to a pharmacy.

If you (excluding Distance Selling Pharmacies) are asked to deliver a prescription to a clinically extremely vulnerable patient, this can be undertaken during the above time period, under the terms of the Advanced service and a claim for payment can be made via the Manage Your Service (MYS) platform.

Welcome to the Team

The Essex LPC Team has just got bigger.....

Really pleased to welcome Frank McLaughlan and Tony Mardle to the team, they join us as Field Officers, initially for the next 6 months. Frank frank@essexlpc.org.uk will be your contact point for North East and West Essex and Tony tony@essexlpc.org.uk for Mid and South Essex for issues relating to Primary Care Networks.

A little more about them...

Registered nurse for over 20 years working at Basildon Hospital and in the community for mental health services. For the last 14 years part of the stop smoking service in South Essex where some of you will know me. Live in South Essex. A long-suffering supporter of West Ham United but also like Rugby and Cricket. I like real ale but don't have a hairy face and big woolly jumper. Have been researching my family tree for about 13 years and will happily chat about the rogues and villains and claims to fame to anyone who is interested. Tony

Joined the LPC during September 2019. Previously worked on the LPC Committee. My role was to support the improvement and completions of TCAM (EMOP) hospital discharge. I support the LPC by representing on various meetings with the CCG and Epping Forest Health Board. With Covid 19 taking priority from March 2020 I then concentrated on supporting resilience groups and EOL services and pharmacies.

As well as continuing to support these groups I am also supporting the PCN Leads.

Background

I worked with most of the multiple pharmacy groups and as area manager I covered geography of Humberside, Leicestershire, Bedfordshire and Essex.

Prior to my time in pharmacy I was working as regional manager for mobile phones and shoe retailers.

I was also merchandise and marketing manager for the House of Fraser Group Scotland. Frank

Also, Mo Raje will be joining us as the Implementation Officer on a project to roll out the GP CPCS referrals. You can reach Mo at mo@essexlpc.org.uk

I am the newest and youngest member of Essex LPC. In my short career I have been a locum for all the major multiples and managed many independent pharmacies. I have worked with NHS England on pilot schemes, been a PCN Lead and have recently qualified as an independent prescriber, which has

opened up opportunities to work in GP practices. I aim to bring my expertise to this new role and ensure that I am successful with hard work, dedication and commitment. throughout the county of Essex – Mo

From Monday 2nd November, pharmacies will start receiving GP referrals, that can be used on the same PharmOutcomes template as CPCS. A message should come up prompting you to confirm the referral has come through a practice and not NHS 111, once this has been confirmed, the templates for both CPCS and GP referral into CPCS will be the same.

Flu Vaccination Service

The Department of Health and Social Care (DHSC) recently published guidance on how community pharmacies will be able to access supplies of flu vaccines procured centrally by the Government, likely timescale is, delivery in November with supplies being received in December.

The PSNC website stated the following:

In the guidance, DHSC segments potential use the vaccines into three groups, with initial use of the stock only allowed for Group A patients:

Group A – Patients and frontline social care workers as set out in Appendix A of the Community Pharmacy Seasonal Influenza Vaccination Advanced Service specification, and frontline health and social care workers through locally agreed occupational health schemes.

Group B – 50-64 year olds, under the NHS Advanced service, but only at a time when DHSC and NHS England and NHS Improvement announce that vaccination of this patient group, or part of the group, should commence in pharmacies and general practices.

Group C – All other patients under private provision or occupational health schemes. Pharmacies will only be able to use the DHSC procured stock for this group of patients if surplus stock is available and DHSC notifies pharmacies that this is permissible.

The stock will be available to purchase from pharmaceutical wholesalers and pharmacies will pay for flu vaccines in the usual way.

DHSC will advise which wholesalers have been allocated stock via the NHSBSA website. The wholesalers will also alert customers when stock is available to order and will advise on delivery times, ordering limits and pricing information.

Supplies of QIVe, QIVc and aTIV vaccines will be available and wholesalers will require pharmacies to complete a declaration before they can access the DHSC stock.

Pharmacy Quality Scheme

Please don't forget that completion of PQS part 1 is a requirement to claim for part 2. Frank and Tony are focusing on supporting the PCN domains at this time, and we are working towards a resources portfolio later in November. Meanwhile you will be pleased to know that PharmOutcomes has made a recording platform available for PQS2 evidence.

Primary Care Networks (PCN)

The Primary Care Leads have now attended 2 training sessions hosted by Liam Stapleton, as part of the Pharmacy Quality Scheme, covering flu vaccination and business continuity plans.

Attached is list of PCN Leads for all networks in Essex.

Stoptober

In spite of the challenges that this year has brought, it has been our best STOPTOBER ever with 650 quit dates set in one month and already over 40 successful quits coming in via Pharmoutcomes. It's been an impressive campaign and one you can feel proud of when nationally, the stop smoking service has been hard to access.

Incentive scheme

A number of you accessed the lunchtime webinars and vouchers will be dispensed during this month. If you missed out on the incentives, don't worry, we will be repeating the Enhanced pharmacy Payments and staff Vouchers in January. Here is a recap on the scheme to be repeated:

Free medication for clients setting quit dates during the months campaign.
Enhanced quit payment of £90 and £10 staff vouchers for each sign up that continued into week 2 – on the provision that someone from the pharmacy attended 2 lunchtime webinar sessions.

November

Continuing on, we already have over 50 quit dates set for November and everyone is getting used to a service that is delivered over the phone thus minimizing F2F contact for the collection of prescriptions.

Performance

The best performing pharmacies have signed up 10 or more clients this year within excess of 50% successful quits. This success is down to staff engagement, additional advisors and offering Champix as a first line treatment option.

Keep Updated

If you want to keep updated on these schemes via WhatsApp, let us know and we can add you to our growing group of over 100 and If you'd like an update or some training, let's do it via zoom for your pharmacy.

Keep it going

In the meantime, and through our 2nd lockdown, please continue to offer a remote service. You've proved that it works, and we thank you for all your hard work.

Lisa Lovell

Please contact office@hlp.co.uk if you would like your pharmacy to provide the stop smoking service.

Essex LPC goes virtual

It's been great to see so many of you join the zoom meetings/webinars. We have covered breakfast and lunchtime sessions, and will be also doing some evening session, so hopefully capturing as many viewers as possible. However, if you have missed any you will find some of the recordings or slides on our website

Introducing **GX2**

anti-bacterial • anti-viral • pH-neutral

GX2 is a wide-spectrum disinfectant and sanitiser that comes in a range of sizes and concentrates to suit your needs.

Our product features an active ingredient that is skin-safe and non-toxic.

GX2 is effective against a wide range of pathogens – bacteria, viruses and fungal spores. Importantly, GX2 is shown to be effective against enveloped viruses including coronaviruses.

GX2 can be used in a range of disinfection applications and because our product is skin-safe and contains no harmful chemical ingredients, it is appropriate for use in sensitive scenarios where hazardous chemicals and disinfectants are not advisable.

GX2 is certified to BS EN 14476 and whilst the product is aimed at larger scale, multi-surface disinfection in the commercial sector, it is also safe for anti-viral hand sanitising.

Our product does not contain alcohol and does not cause irritation or dry skin like many alcohol-based products do. Our disinfectant is water-based – and is free of solvents, aldehydes or perfumes.

GX2 is extremely easy to use. Just apply to hard or non-porous surfaces and leave to dry.

GX2 IS PERFECT FOR MULTIPLE DISINFECTION APPLICATIONS, FROM THE CARE SECTOR, TO SCHOOLS AND OFFICES.

GX2 is proudly made in the UK by:

Triolutions Ltd.,

Unit 36

42 Dalsetter Ave,

Glasgow, G15 8TE
