

March 2020

Achieve community services in Bolton, Bury, Salford and Trafford have been working closely with pharmacies across the region since the outbreak of Covid-19.

It has been agreed the supervision element of daily supervised prescriptions can be dropped on current prescriptions.

Achieve have undertaken a piece of work to change most patients on prescriptions to weekly dispense. This should happen from their next prescription. The only patients who will not be reduced to weekly are our most vulnerable, high risk patients.
