## MANOR PHARMACY

Mohamed and Talha Patel have been reflecting on the unprecedented times we are currently experiencing.

"This period has definitely brought home the importance of the role of pharmacy every day in so many lives."

"Not just as a profession delivering a service but the social and emotional support our teams are so familiar with providing too."

"Over the years our patients and customers have become our family, and very often as we visit branches the directors bump into old friends and customers who have been with us for years."

"After realising the impact this pandemic has had on our 'more vulnerable' patients and customers the directors had decided to send a little 'Covid19 Essentials' parcel to those of are patients that are unable to perhaps get out from isolation or struggling with basics."

Thank you to your team!
