## Procedure if drugs cannot be obtained from the above pharmacies

In the event of drugs being required **outside of the extended hours** (listed above), ONE pharmacy has agreed to provide an emergency out of hours service.

Any drug may be supplied but it must be for patients receiving palliative care and it must be required urgently. **Only the attending prescriber can activate the service.**

The pharmacist will normally take the prescription details during the telephone call from the attending prescriber, prepare the medicines at his/her pharmacy and deliver the medicines directly to the patient's home and, on arrival, check that the dispensed medicine(s) corresponds with the written prescription.
