

## COPD

This learning programme aims to enable you to interpret and apply clinical guidance to support people living with COPD. You will consider how to optimise their treatment, identify 'red flag' signs and symptoms, collate local resources to support and signpost people living with COPD and use a person-centred approach to empower them to self-manage their condition.

## Dementia

This programme aims to help you apply your knowledge and skills to manage and optimise care for patients living with dementia and their carers. This includes outlining adjustments you could make to improve general practice consultations, discussing anticholinergic burden, the use of antipsychotics and becoming a Dementia Friends Champion.

## Deprescribing

In this programme, we will explore how all pharmacy professionals can contribute towards safe and appropriate deprescribing of medicines. You will learn how to recognise a person-centred approach that considers the patient's perspective and experiences and apply a stepwise approach to the process of deprescribing from identification through to reducing or stopping a medicine.

## Emergency Contraception

The aim of this programme is to enable pharmacy professionals to acquire the knowledge, develop the skills and demonstrate the behaviours needed to provide high-quality emergency contraception services as part of their pharmacy practice. It is an opportunity to hear from an expert in contraception and sexual health, to reflect on your current practice and share with your colleagues.

### Asthma

This online workshop aims to enable you to interpret and apply clinical guidance to support people living with asthma. You will apply your knowledge of asthma management and guidelines and explore how you can support people to manage their asthma, reduce complications and improve their quality of life.

<https://www.cppe.ac.uk/programmes/e/asthma-ew-01>

### Consultation skills

This online workshop introduces you to the skills and techniques to ensure that your consultations are person centered. During the workshop you will have opportunity to discuss with peers and practice your consultation skills in a safe environment.

<https://www.cppe.ac.uk/programmes/l/consult-ew-01/>

### Medicines optimisation in care homes

The aim of this event is to support clinical pharmacy professionals working in primary care to develop the knowledge, skills and confidence that needed to implement strategies to optimise medicines use for people living in care homes.

<https://www.cppe.ac.uk/programmes/e/cpgpem3-ew-01>

### Mental Capacity Act

The aim of this e-workshop is to develop your knowledge and skills to help you manage and optimise care for patients who might lack mental capacity to make a specific decision relating to their medicines at a given point in time.

<https://www.cppe.ac.uk/programmes/e/mentalcap-ew-01>

### Antimicrobial stewardship

The aim of this programme is to encourage pharmacy and other healthcare professionals to make antimicrobial stewardship a routine part of their practice. You will discuss how you can apply your learning in practice and use this to contribute to your revalidation.

<https://www.cppe.ac.uk/programmes/e/antimicro-ew-01>

### NHS CPCS

The aim of this programme is to support pharmacists to develop the knowledge, skills and confidence needed to undertake effective consultations, communications and clinical assessments in order to provide the NHS community pharmacist consultation service (NHS CPCS).

<https://www.cppe.ac.uk/programmes//cpcs-ew-01/>

### Falls prevention

The aim of this workshop is to increase your understanding of falls and how the pharmacy team can help prevent and support those who have had a fall. You should also be able to identify the factors that contribute to the increased risk of falls and identify people at risk of falls.

<https://www.cppe.ac.uk/programmes/e/falls-ew-01>

### Depression

At least a third of the population will experience an episode of mild depression during their lifetime. This programme will equip pharmacists to identify how they can address concerns of people with depression, optimise their medicines and achieve better health outcomes.
