

New PSNC website launched

Following a period of user testing, our new website has now fully launched. Key improvements for the new PSNC website include, but are not limited to:

- A redesigned, more functional homepage;
- An improved search function, including suggested search terms for users;
- The addition of a most popular pages category for each section of the website, helping contractors to easily find the current important topics and most popular things on the site; and
- A new public-facing area of the website containing a wealth of information about the role and importance of community pharmacy for external stakeholders, such as MPs and charities.

This introductory guide talks you through some of the new and improved elements in more detail.

Header and main menu

These appear at the top of every page of the website. To make navigating the website easier, the main menu remains on display even when you travel down a page. However, to avoid obstructing users' experience when trying to view the page, the menu will resize appropriately as visitors scroll down.

The screenshot shows the PSNC website homepage. At the top left is the PSNC logo and the text 'Pharmaceutical Services Negotiating Committee'. In the center is a search bar with the placeholder text 'Hello, what are you looking for today?' and a magnifying glass icon. At the top right are links for 'Contact Us' and 'Not a pharmacy Use these resources >'. Below the header is a horizontal main menu with categories: 'Quick Links', 'PSNC & Negotiations', 'Funding & Reimbursement', 'Quality & Regulations', 'Dispensing & Supply', 'National Pharmacy Services', 'Digital & Technology', and 'LPCs & Local'. The main content area is divided into several columns of links. A 'Most Popular' section on the right features a list of popular links and a photograph of a pharmacy storefront. Three callout boxes provide additional information: one points to the search bar, another to the 'Not a pharmacy' link, and a third to the 'Most Popular' section.

Try our new improved search function.

Easy to find links to our contact details and new 'Not a pharmacy' section for patients, politicians, journalists, etc.

Each section of our menu now has most popular links, to help you find the information you want.

Top section of homepage

Our 'Headline' news stories are now prominently displayed at the top of the homepage.
